

Table of Contents

Chapter One - Introduction	1-1
Introduction	1-1
Memory Device Basics	1-2
The Memory Device	1-2
Testing	1-3
Patterns	1-4
Chapter Two - SRAM	2-1
Introduction to Memories	2-1
Static Random Access Memory (SRAM)	2-1
Static RAM	2-2
The SRAM Cell	2-3
Fault Types	2-4
Stuck at Fault	2-5
The Array	2-6
Array Faults	2-9
Coupling Fault	2-9
Neighborhood Pattern Sensitive Fault (NPSF)	2-10
Addressing	2-10
Address Faults	2-15
Output Buffers	2-16
Transition Faults	2-17
Control Logic	2-18
Logic Tables	2-19
Write Timing	2-20
Read Timing	2-21
Chapter Three - Test Patterns	3-1
Introduction to Test Patterns	3-1
Test Patterns	3-2
Checkerboard Pattern	3-3
Micro Code	3-6

Address Complement	3-13
March	3-18
Read Modify Write	3-22
March C	3-25
MATS++	3-30
Sliding Diagonal	3-33
Walk Pattern	3-47
Galloping Pattern	3-51
Butterfly Pattern	3-54
Modified Butterfly Pattern	3-62
Moving Inversion (Movi) Pattern	3-65
Chapter Four - Memory Testers	4-1
Introduction	4-1
AC Subsystem	4-2
Micro Code	4-3
Pre and Post Processing	4-3
Pre-Increment	4-4
Post-Increment	4-4
Arithmetic Logic Unit (ALU)	4-6
Topological Scrambling	4-6
Address Topology	4-6
Data Generator	4-10
Data Topology	4-11
Data Topological Scrambling	4-11
Data Buffer Memory (DBM)	4-14
V Bump	4-15
Voltage In Very High (VIHH)	4-16
Interrupt Timer	4-17
Refresh Timer	4-17
Error Catch RAM (ECR)	4-18
Bit Maps	4-19
Redundancy Analysis (RA)	4-21
Data Compression	4-22
I/O Timing	4-22
Device ID	4-23
Dedicated Pins	4-24
Alpha Particles	4-24
Tester Pipeline	4-25
Multiple Device Testing	4-26
Independent Test Sites	4-26
Parallel Test Sites	4-27

Test Head	4-27
Handlers	4-27
Strip Test	4-28
Wafer Sort	4-28
Bump Technology	4-28
Chapter Five - Memory Test Programs	5-1
Introduction	5-1
Opens and Shorts Testing	5-1
Functional Testing for Memory Devices	5-2
Test Fixture	5-2
Power Decoupling	5-3
Probe Cards & Wafer Sort	5-3
Load Board Tests	5-4
Parallel Hardware	5-5
Handler Limitations	5-5
Contactor Limitations	5-6
Matrix or Strip Testing	5-6
Test During Burn In	5-7
Debug	5-7
Tester, Load Board, Device, and Program	5-7
Debug Sequence	5-8
Oscilloscope	5-8
Looping	5-8
Common Problems	5-9
Pattern hang	5-9
Missed or Skipped Addresses	5-9
Pattern Never Fails	5-9
Forced Pass	5-10
Using Topologically Sensitive Patterns and not Using Scrambling	5-10
Dead Cycles	5-10
Learning Debug Techniques	5-11
Appendix A -Pattern Examples	A-1
Checkerboard Pattern	A-1
Introduction	A-1
Checkerboard Pattern Example	A-1
Checkerboard Y Fast Pattern	A-4
Introduction	A-4
Checkerboard Y Fast Example	A-4
Address Complement	A-7
Introduction	A-7

Address Complement Sequence Example	A-7
March Pattern	A-11
Introduction	A-11
March Pattern Example	A-11
March C- Pattern	A-15
Introduction	A-15
March C- Pattern Example	A-16
Matts+ Pattern	A-29
Introduction	A-29
Matts+ Pattern Example	A-29
Moving Inversion (Movi) Pattern	A-35
Introduction	A-35
Moving Inversion Pattern Example	A-36
Sliding Diagonal Pattern	A-39
Introduction	A-39
Sliding Diagonal Pattern Example	A-39
Walking Pattern	A-59
Introduction	A-59
Walking Ones Through a Pattern of Zeros Example	A-60
Galloping Pattern (Galpat)	A-70
Introduction	A-70
Galloping Pattern Example	A-71
Butterfly Pattern	A-83
Introduction	A-83
Butterfly Pattern Example	A-83
Modified Butterfly Pattern	A-92
Introduction	A-92
Butterfly Pattern Example	A-92
Appendix B - Code Samples	B-1
Checkerboard Pattern Sample Code	B-1
Checkerboard background generation	B-1
Checkerboard without background generation	B-2
Address Complement Pattern Sample Code	B-3
March Pattern Sample Code	B-4
March C- Pattern Sample Code	B-5
Matts+ Pattern Sample Code	B-7
Moving Inversion Pattern Sample Code	B-8
Matts+ Pattern Sample Code	B-9
Sliding Diagonal Pattern Sample Code	B-10

Walk Pattern (Walkpat) Sample Code	B-12
Galloping Pattern (Galpat) Sample Code	B-13
Butterfly Pattern Sample Code	B-14
Appendix C - Fault Coverage Synopsis	C-1
Fault Coverage Synopsis	C-1
Appendix D - Pattern Execution Times	D-1
Pattern Execution Times	D-1
Appendix E - 246 x 4 SRAM Specification	E-1
SRAM Specification Examples	E-1
Glossary	Glossary-1
Index	Index-1
